Continuation of Substance of Interview including description of the general nature of what was discussed: Exr. Eashoo called Ms. Curbelo regarding a proposed Exr. Amdt. to claim 29 adding the limitation directed to the retardation value recited in claim 11 (preamble). The amendment was needed because applicant's arguments directed to the process forming a structure with specific retardation properties, filed 29-DEC-2003, are persuasive. However, without the proposed amendment the arguments would not apply to claim 29. Ms. Curbelo approved the amendment.
